## Brief Introduction

DS11 is Wi-Fi door sensor with the double reed switch to detect if a window or door is open in real time. It is easy to install by adhesive tape, without destroying the appearance and structure of the original furniture, therefore the detector can be placed and used at will according to your requirements. When you are away from home, you can receive real-time notifications about the abnormal status, such as window/door alarm intuitive. The Wi-Fi supported door sensor is compatible with all-in-one smart home app ZSmart, you can realize various of powerful and useful functions such as remote control, real-time alerts and review the history record.

DS11 will be a wise choice for doors, windows, cabinets, drawers or any place you want to be notified when they are opened or closed, it creates a safer, smarter, and more convenient lives.
